Subject: Commitment to Net Zero Emissions by 2028

Dear All,

As per the Zero-Carbon Campus Policy adopted by the university and the commitment by us to achieve **Net Zero Emissions by 2028**, in alignment with the United Nations Climate Change Conference (COP26) and global sustainability goals, the University has launched multiple initiatives like solar energy adoption, biogas production, energy-efficient infrastructure, sustainable transportation policies, and green campus efforts such as afforestation and waste recycling.

To strengthen it further for the success of this mission, all faculty members, staff, and students are urged to take necessary measures within their respective roles to reduce carbon emissions and promote environmentally responsible practices. This includes conserving energy, minimizing waste, opting for shared or electric transport, and supporting green initiatives on campus.

Together, let us make Shoolini University a model for sustainability and climate responsibility. For more information or to get involved, please contact the **Director Sustainability**.

Yours faithfully,
